

QObject

QGraphicsItem

VSI::ElementArea

```
classDiagram
    class QObject
    class QGraphicsItem
    class VSIElementArea["VSI::ElementArea"]
    VSIElementArea --> QObject
    VSIElementArea --> QGraphicsItem
```

The diagram illustrates a class hierarchy where `VSI::ElementArea` is a base class for both `QObject` and `QGraphicsItem`. A horizontal line connects the two upper boxes, with a vertical line descending from its center to the top of the `VSI::ElementArea` box. From this vertical line, two arrows point upwards to the bottom of the `QObject` and `QGraphicsItem` boxes, indicating inheritance.
